

# NEFERTITI needs YOU

## **We are building a EU farm demo network**

NEFERTITI is a unique EU farm demo project that establishes thematic networks focused on farmers key concerns. These networks cover a balanced range of topics in three main sectors: animal production, arable farming and horticultural production.

The overall objective of NEFERTITI is to establish a EU-wide highly connected network of demo-farms designed to enhance knowledge exchange, cross fertilization among actors and efficient innovation uptake in the farming sector, through peer-to-peer demonstration of techniques.

## What Nefertiti can offer you?

- A Farm Demo platform, to help you build a EU wide network
- A guide on how to set up a hub of demo farms
- A training kit on farm demo procedures and best practices
- A diversity of information material, including videos, infosheets and practice abstracts
- Participation in Nefertiti meetings and knowledge exchange sessions
- Online visibility on the Nefertiti platform and web / social media channels

## 10 Networks

NEFERTITI established **45 regional clusters (hubs)** that bring together a wide range of demo-farmers and other innovation actors working on a given topic. These hubs are organised in **10 thematic networks**, representing key concerns in the agricultural sector in Europe.

**More than 250 demo events are organised per year** within the context of the project, spread across 13 EU countries. These events put together **more than 12 000 participants per year**, with at least 50% of farmers.

All relevant actors and stakeholders work together in these networks - farmers, suppliers, researchers, advisors and policy makers - contributing to a more **COMPETITIVE, SUSTAINABLE** and **CLIMATE-SMART AGRICULTURE**.

Grassland & carbon sequestration

Data driven decisions for dairy farmers

Robust organic livestock systems

Optimal soil quality in arable crops

Arable crop sensing & variable rate applications

Increasing productivity & quality in organic arable crops

Improved nutrient use efficiency in horticulture

Water use efficiency in horticulture

Reducing pesticides use in the production of grapes, fruits & vegetables

You can farm!

## Why shall you join a Nefertiti network?

**To share** research results and practical applications from your region or country

**To learn** from research results, best practices and innovations, improving farming systems

**To know** about farmer's needs, challenges, best-practices and solutions

**To benefit** from innovation partnerships across new value chains

**To become** an active partner of the NEFERTITI community, building up a sustainable future

## What we expect from a new Hub?

All members of the NEFERTITI community have an active involvement in the activities and goals of the network. Any institution that aims to integrate a new hub in Nefertiti is expected to accomplish the following basic requirements:

**Integrate the hub in one of the 10 Nefertiti thematic networks,** participating in regional, national and EU level activities to boost knowledge exchange and cross fertilisation

**Participate in the development of the 'Dynamic Action Plans'** that are produced by each network every year, identifying the needs of demonstration actors

**Support the annual cycles of demo-activities and peer-to-peer learning,** involving different innovation actors to improve science-practice interactions and the uptake of knowledge

**Foster the learning process of all actors involved in demo-activities,** identifying best practices and interactivity on similar themes over Europe

**Communicate and disseminate** the practical-oriented outcomes adapted to local level

**Improve the policy dialogue and networking** with the regional and national authorities

## **REGISTER NOW**

Join the NEFERTITI network by scanning the QR code  
or following the Web link to the registration form.
